#### Performance & Market Commentary - July 2016

- After the shock of Brexit late in June, markets rebounded in July as the pre-vote worst case scenarios failed to materialise. Economic data was largely benign as stronger US employment numbers were offset by weaker than expected GDP. US interest rates were kept on hold. Gold rallied 2% while Oil fell 15% giving back much of last quarter's gains.
- All major markets rose over the month with the S&P 500 gaining 3.6% and reaching fresh all-time highs. In Europe, Germany rallied 6.8%, France rose 4.8% while the UK gained 3.4%. Japan rose 6.4% on a weakening Yen and China added 1.7%.
- Information Technology and Financial sectors drove the market higher while Energy lagged on a weaker oil price. Consumer Staples were a notable underperformer as 10 year bond yields rallied off their lows.
- The Hedged Fund returned 3.84% in July compared to the Hedged Benchmark's 4.11% return. Our portfolio fully participated in the market recovery despite an approximate 58% market exposure.
- The underlying portfolio's Financials including Bank of America, Citigroup and ING Group benefitted as long bond rates rose from post-Brexit lows. Attractive valuations, strong capital ratios and a focus on returning capital to shareholders continues to make selected Financials a compelling investment.
- Healthcare stocks Allergan and Teva gained after completing their Actavis Generics deal. The deal allows Allergan to focus on its branded pharmaceutical business while bringing global scale to Teva's generics portfolio. Global recruitment firm Adecco staged a strong recovery from its Brexit sell off.
- Canadian Natural Resources and ENI declined on the back of the oil price's retreat.
- Attractive investment opportunities exist in less crowded sectors of the market despite a subdued outlook for broader index level returns. We maintain our cautious outlook for bond proxies in the equity market, which are prevalent within the Consumer Staples, Telecoms and Utilities sectors.

**Wingate Asset Management (Wingate Global Equity Fund) was an Undiscovered Manager Category Finalist in the Morningstar Awards 2014, Australia**

Morningstar Awards 2014(c). Morningstar, Inc. All Rights Reserved. Awarded to Wingate Asset Management (Wingate Global Equity Fund) Undiscovered Manager Finalist, Australia.

**About the Morningstar Awards™**

The Morningstar Awards™ honour those fund managers that have added the most value for investors, within the context of a relevant peer group, over the past year and the longer term. The Awards are determined by a combination of fund research analyst conviction, risk-adjusted medium- to long-term track record, and performance in the 2013 calendar year.

**About the Undiscovered Manager Category**

The Morningstar Undiscovered Manager Finalist Award identifies and recognises the Australia-domiciled fund manager which, in Morningstar's opinion, has excelled in its sector in the year for which the award has been made.

The Morningstar Undiscovered Manager Category finalist is the fund manager that, while possessing strong investment management capabilities has not yet achieved wide market recognition, or which Morningstar's fund analysts believe has the ability and opportunity to build a successful long-term track record through its performance and investment management capabilities. The funds eligible for this award will not necessarily have a three-year track record. Finalists are determined from an assessment of their investment capabilities and quantitative data.
